Photos: (12 color slides)

Time: (Sd 1) & (Sd 2)

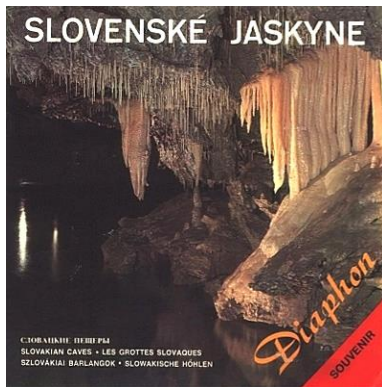

1. EP: SLOVENSKÉ JASKYNE (Gatefold cover)

Opus 91 38 0096 (stereo)

2. Re-edition EP: SLOVENSKÉ JASKYNE (Gatefold cover) (1982)

Pressfoto (?)

Spec: (Both) 7" 45rpm (Sides 1 & 2)

Notes: A rapid survey of the 11 most important show caves in the Slovak Republic – Belianska jaskyňa, Bystrianska jaskyňa, Demänovská jaskyňa Slobody, Demänovská ľadová jaskyňa (Ice Cave), Jeskyňa Domica, Jeskyňa Driny, Jasovská jaskyňa, Gombasecká jaskyňa, Harmanecká jaskyňa, Ochtinská aragonitová jaskyňa, and Važecká jaskyňa.

The duplicated slides included here are of good quality and did not fade or lose color over the years.

There was a re-edition of this souvenir disc and slide package in 1982. The unas.cz site shows a different cover and another set of 12 different color slides for a Diaphon program with the same title. However, it is not known if the spoken word recording is any different here. The printed text inside the gatefold cover is the same in Slovak, Russian, German, French, and English for both editions, but this second edition also has a

Hungarian text and the order of printing is different.

Both picture covers show calcite formations and water in the Demänovská Cave of Liberty.

The 1950 coffee table book of remarkable black and white art photos is a beautiful compliment to this spoken word record and its 12 color slides. All but three of the eleven caves treated here are pictured in the book.
