caveinspiredmusic.com

HOW TO USE THIS PAGE

Since this Website has been created using html base pages containing only pdf documents, a special system of navigation within this site is required.

In order to fully take advantage of all the data concerning each spoken word entry in each section it is necessary to create tabs:

The first tab to be used as the reference page to read the data and notes about the chosen entry

The second tab to be used to go to the links for that entry to either hear the reading or access sources

FOR BROWSER – GOOGLE CHROME

This site works best when using a Google Chrome browser

Choose the section that you wish to consult then right click on it and select "Open link in new tab"

Repeat this process and right click on that same section and select "Open link in new tab"

You now have 2 tabs at the top of your screen –

The first tab to be used as the reference page to read the data and notes about the chosen entry

The second tab to be used to go to the links for that entry to either hear the reading or access sources –

When finished hearing the reading or consulting a source click on the return arrow to go back to the pdf page

If necessary you can even open a fourth tab for the abbreviations (this pdf document is at the bottom of the blue column)

FOR BROWSER – FIREFOX

This site works moderately well when you use a Firefox browser

Choose the section that you wish to consult then right click on it and select "Open link in new tab"

(Each time that you create a new tab the selected pdf document will pop up and you will have to go back

to the Adult Fiction base page and proceed to open another tab)

Repeat the process and right click on that same section and select "Open link in new tab"

Then go down the blue column and select "Lyrics" and right click on it and select "Open link in new tab"
Once on the last chosen pdf page, right click and you will see within a black band the three pdf documents, that is
    the 2 copies of the chosen section:
        The first tab to be used as the reference page to read the data and notes about the chosen entry
        The second tab to be used to go to the links for that entry to either hear the section or access sources
            When finished hearing the section or consulting a source you will need to go back to the Adult Fiction base
            page and again click on the selected country

FOR BROWSER – INTERNET EXPLORER

Things get very complicated for Internet Explorer because it uses the Windows 8 system.
Best said, this site really does not work properly when you use Internet Explorer.
Choose the section that you wish to consult then right click on it and select "Open link in new tab"
Now go back and click on the section you have selected and open it
Once the chosen pdf page has been opened, right click and you will see within a black band the chosen pdf document
      plus the lyrics pdf document
Then all you have to do is click on the desired pdf document
When consulting a pdf document for a section, click on links for a chosen entry to either hear the reading or access
      sources
Once you are finished and go to close the link you will automatically return to the Adult Fiction base page and be obliged
      to repeat the entire process outlined above
