

PICTURE COVERS – STYLIZED BATS

BAT-SHAPED DISCS

In chronological order by release dates

Stylized Bat Shaped Disc No. 1

PC-BT-SD1 United Kingdom 1983

EP: RETURNING FROM A JOURNEY/ KISS KISS BANG BANG

Perf: The Specimen (Rock)

Prod Co: London Records Ltd.

Label: London LONPD 24

Spec: 11" 45rpm (stereo)

Notes: A simplified stylized black bat shape cut out of vinyl with a small spindle hole and the grooves taking up the normal 7 inch space.

The gothic hard rock group, The Specimen, started in Bristol in 1981 and later moved to London where in July 1982 they first started performing in the famous Soho rock club, Batcave. These two songs have nothing to do with bats, but the band's connection with the Batcave might explain the bat shaped disc.

Notes: These 21 bat shaped picture discs all have a simplified stylized black bat shape cut out of vinyl, which has a small head with ears and eyes. Indicated at the bottom is the bat's tail and its [uropatagium](#) or interfemoral membrane or maybe its feet. This same bat-shaped vinyl was used for several heavy metal rock group interviews all released on the Tell Tales label.

Regarding these interviews – “Each interview is presented independently and without collaboration of the artists. This enables us to produce items without artistic or management censorship, which means we can often present a wider view of the artists and their opinions.” (Anon. 2016)

The bat-shaped disc for Tell Tales 1016 with the Aerosmith interview, was also released as a 7 inch 33rpm disc. It was not possible to provide decent quality images of five of these bat-shaped picture discs: Tell

Tales 1003 (Billy Idol); Tell Tales 1004 (Iron Maiden); Tell Tales 1007 (Metallica); Tell Tales 1011 (Warlock); or Tell Tales 1018 (Skid Row).
