**Notes:** This entire CD is guided meditation accompanied with New Age music “composed specifically to aid in the meditative journey.” The liner notes say – “Take a journey to the depths of your being and find the parts of yourself that are hidden there like buried treasure. Travel into the depths of the earth and find the precious crystals or gems waiting for you there to integrate into your being so that you can gain the understanding and awareness from this experience so that you may become whole.” For excerpts from her meditation text see under Spoken Word – Adult – [Meditation](#).

On the first track there are three instrumental synth breaks, each lasting about 3 minutes. The second track is over 20 minutes of entirely New Age synthesizer music sometimes crystalline and other times dreamy.
